

AMENDMENTS TO THE SPECIFICATION

Please insert in the first sentence after the title, the following new paragraph.

This application is the U.S. national stage of International Application PCT/EP03/02633, filed March 10, 2003.

Please insert the following new paragraph at page 2, line 29.

Brief Description of the Drawings

Figure 1 is a ^{13}C -NMR spectral chart used for the measurement of CSD.

Please replace the paragraph beginning at page 5, line 13, and ending at line 16 with the following paragraph.

The viscosity ratio ($[\eta]\text{B-1}/[\eta]\text{A}$) of the copolymer (B-1) to the polypropylene component (A) in the invention is 1.5 or less, preferably 1.3 or less, and ~~more~~ preferably 1.2 or less. When it is 1.5 or less, the impact resistance at low temperatures is further improved, and the transparency is improved as well whereby that is preferred.

Please replace the paragraph of the Abstract with the following paragraph.

ABSTRACT

A polypropylene resin composition comprising ~~(by weight)~~ 40 to 80% of a polypropylene component (A) comprising a copolymer of propylene with ethylene and/or a C_{4-12} α -olefin, or a homopolymer of propylene, and 20 to 60% of a copolymer component (B) containing a copolymer (B-1) and a copolymer (B-2), wherein both (B-1) and (B-2) are copolymers of propylene with ethylene and/or a C_{4-12} α -olefin, in (B-1) the amount of units derived from propylene is ~~from more than 50% by weight~~ to 85% by weight, and in (B-2) the amount of units derived from propylene is 15 to 50% by weight, the molecular weight distribution (M_w/M_n) is 3.0 or less, and blockness (~~CSD~~) ~~determined using the measured NMR values~~ is 1.3 or less; in which composition the amount of (B-2) ~~with respect to the whole polypropylene resin composition~~ is 3% or more, and the ratio of the limiting viscosity of (B-1) to the viscosity of (A)

$([\eta]_{B-1}/[\eta]_A)$ is 1.5 or less, and the ratio of the limiting viscosity of (B-1) to the viscosity of (B-2) ($[\eta]_{B-1}/[\eta]_{B-2}$) is 0.8 or more.

Please replace the paragraph beginning at page 21, line 1, and ending at line 6 with the following paragraph.

In accordance with the invention, it is now possible to provide a polypropylene resin composition which is not affected by molding machines and molding conditions upon molding, does not generate fish eye and the like, shows excellent appearance and transparency and is excellent in impact resistance at low temperatures, heat resistance and rigidity and also to provide a molding thereof.
